Experience

Varonis

Mar 2024 – Present

Cloud Security Developer

Herzliya, IL

- Researched, designed, and integrated infrastructure solutions for open-source tools, using Python, RDS and Neo4j, and enhanced security risks converge by 35%.
- Became the go-to expert within the company for implementing security risk detection and remediation, providing mentorship, design consultations, and code reviews to drive robust, secure, and scalable implementations.
- Led the process for creating Varonis Research Group's Python guidelines, partnering with multiple teams to design and implement elegant solutions for cross-company problems.

Varonis

Feb 2021 – Oct 2021

QA Engineer

Herzliya, IL

- Established and led the QA team within the startup "Polyrize", integrating the team into Varonis post-acquisition.
- Analyzed root causes of key production bugs, optimized testing methods, and reduced recurring bugs by 22%. Accelerated release cycles through shift-left approach.

Ping Identity

Nov 2019 – Feb 2021

QA Engineer

Tel Aviv, IL

- Designed, wrote, and executed comprehensive test strategies, implemented diverse testing methods to enhance user experience and product stability by 10%.

Education

The Hebrew University of Jerusalem

Oct 2021 - Feb 2025

Bachelor of Science in Computer Science and Computational Biology (GPA: 86.8)

Jerusalem, IL

- **Relevant Coursework:** Intro to CS (Python), Data Structures and Algorithms (C++), Intro to ML (Python), NLP (Python), Algorithms in Computational Biology (Python), Object-oriented programming (Java), Operation Systems (C++).

Habib's Lab, The Hebrew University

Aug 2023 – Present

Research and Development Assistant

Jerusalem, IL

- Implemented machine learning models and algorithms, analyzed over 64,000 cells to find disease-associated gene expression programs in Alzheimer's disease research.

Military Service

8200's Operative Unit

Nov 2015 – Jan 2019

Combat SIGINT Commander

Tel Aviv, IL

- Completed year-long combat intelligence training with honors, specializing in tech-intelligence. Sharpened skills in teamwork & self-directed learning.
- Led and supervised eight NCOs as the Managing and Professions Officer at the Unit's school.

Technical Skills

Languages: Python, C, C++, Java, R,

Technologies: RDS, Neo4j, Numpy, Pandas, Scikit-learn, AWS, Jenkins, Docker, Linux, JIRA, Flask.

Concepts: Rational databases, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Neural Networks, API, Natural Language Processing, Agile Methodology.
